ACROVYN CHAMELEON SIMULATED PATTERNS

20x MORE DURABLE THAN STAINED WOOD | 4x MORE DURABLE THAN LAMINATE

CS has been operating in Australia for over 30 years and our products have been chosen to feature on hundreds of major construction works across the country.

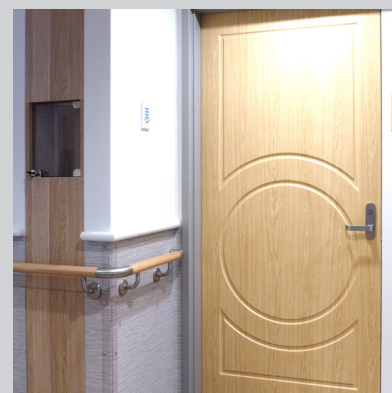

World-renowned Acrovyn Sheet and Profiles are now available in simulated patterns, from various wood grain effects to metal effect.

The Acrovyn Chameleon simulated patterns were developed to withstand the abuse real wood can't handle and deliver a warm, more homely aesthetic to areas vulnerable to impact damage.

Their durability is proven both in the lab and in the field and is backed with a lifetime warranty (call Construction Specialties for warranty details).

Available on many Acrovyn profiles, wall covering, wall panels and Acrovyn doors, Chameleon offers several woodgrain and other simulated pattern options that are 20x more durable than stained wood and 4x more durable than laminate.

Contact us today for your fit-out programmes.

ACROVYN CHAMELEON SIMULATED PATTERNS

20x MORE DURABLE THAN STAINED WOOD | 4x MORE DURABLE THAN LAMINATE

Due to limitations of the printing process, colors shown may vary. When specifying, obtain color samples by calling factory.
