

REGUPOL® IT JUST FEELS RIGHT

# RUBBER FLOORING COLLECTION

everroll®

Regupol®

**Regupol**  
Australia

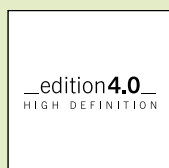

## Presenting everroll® from Regupol.

Here is a collection of flooring products that satisfies the rudimentary concerns of function and form. Such attributes are not unexpected when you consider their German origins. At the same time, they deliver on sustainability, incorporating high quality post-consumer and pre-consumer materials. This helps open the door to green building design briefs which may be out of reach to lesser products.

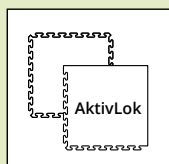

**everroll®** offers seven distinctive product ranges, infused with fragments of colour which harmonise with other flooring systems and contemporary furnishings. All **everroll®** products are homogeneous, have no wear layer and are PVC free.

**edition 4.0** brings a new high definition surface to our Core and Tone Ranges. edition 4.0 reproduces floor colours in their full intensity under almost any lighting conditions, while minimising gloss reflectance.

### Reguseal

**Reguseal** is an advanced polymer technology specifically developed for everroll® rubber flooring; it is long lasting and makes cleaning a breeze. We can apply sealer in our factory saving time and money, or in 6-litre kits that can be installed over existing everroll® installations.

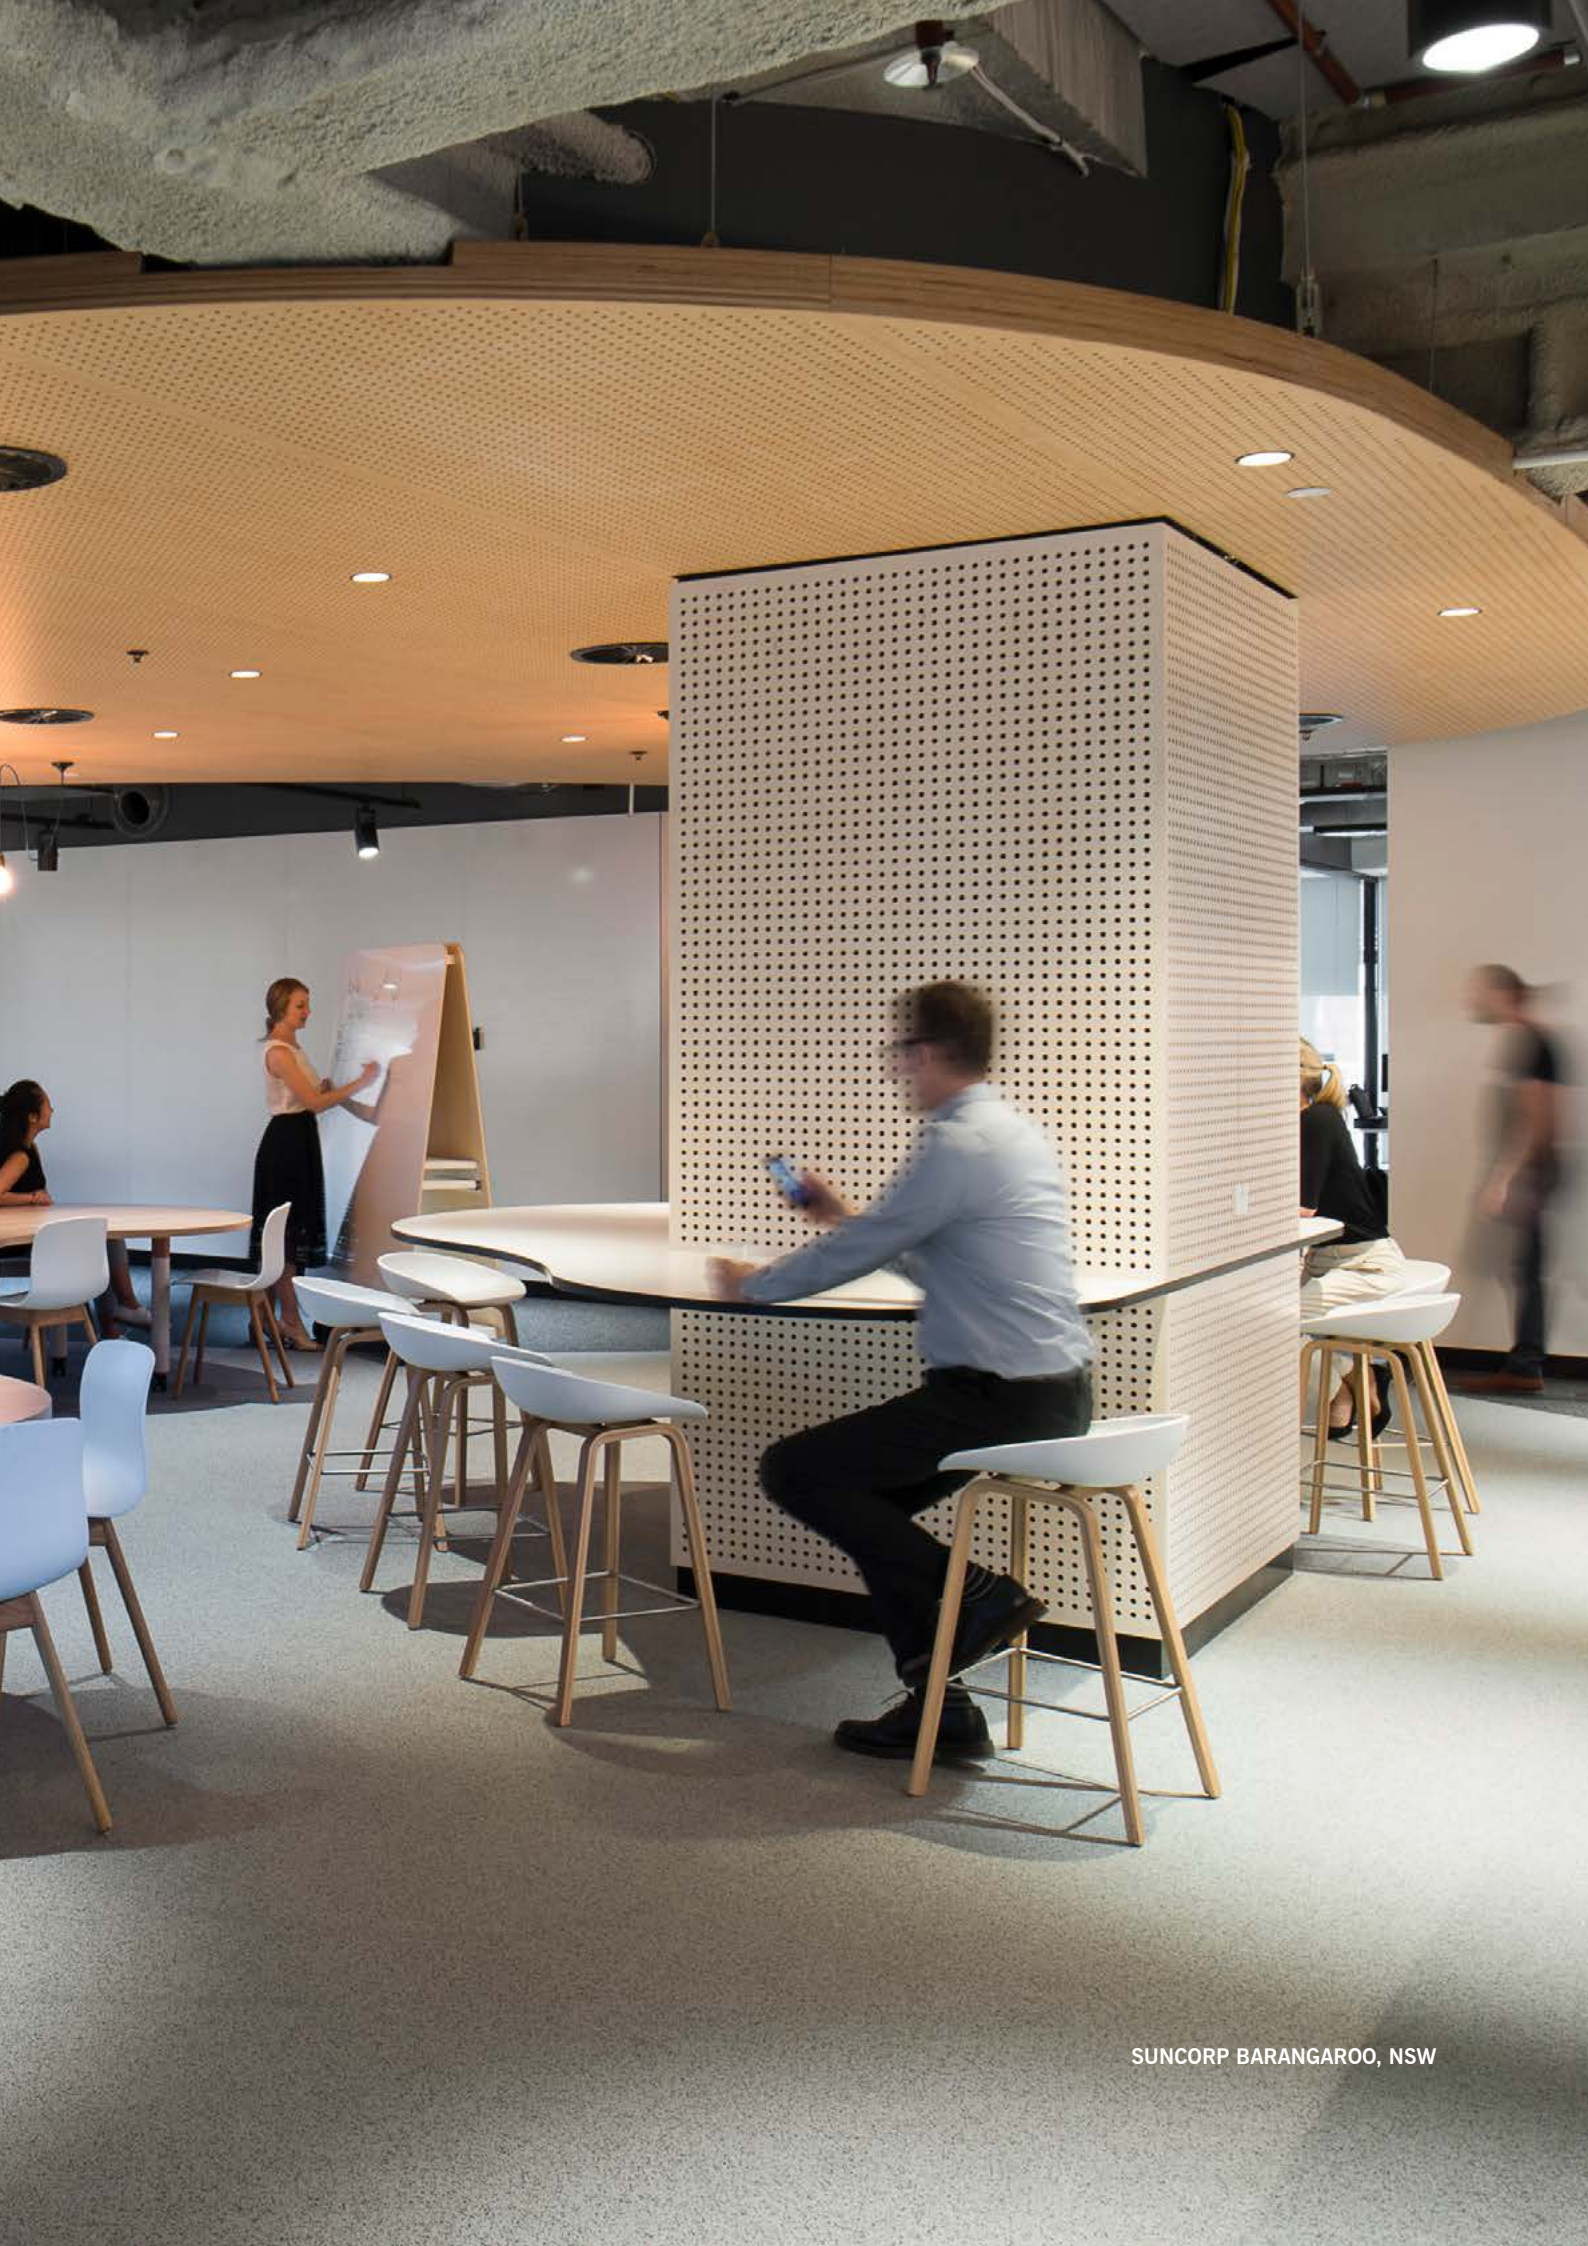

**AktivLok Interlocking Tiles** are designed to fit neatly together with minimal seam visibility, and can be loose-laid over almost any sub floor without permanent bonding. Available in 600mm and 1200mm tiles.

*Please Note: All images contained in this brochure are for illustration purposes only. Please request a product sample from your Regupol Team Member before making a decision. The everroll® collection of rubber flooring is made from recycled materials, variations in the shading, EPDM and colour chip dispersion is normal.*

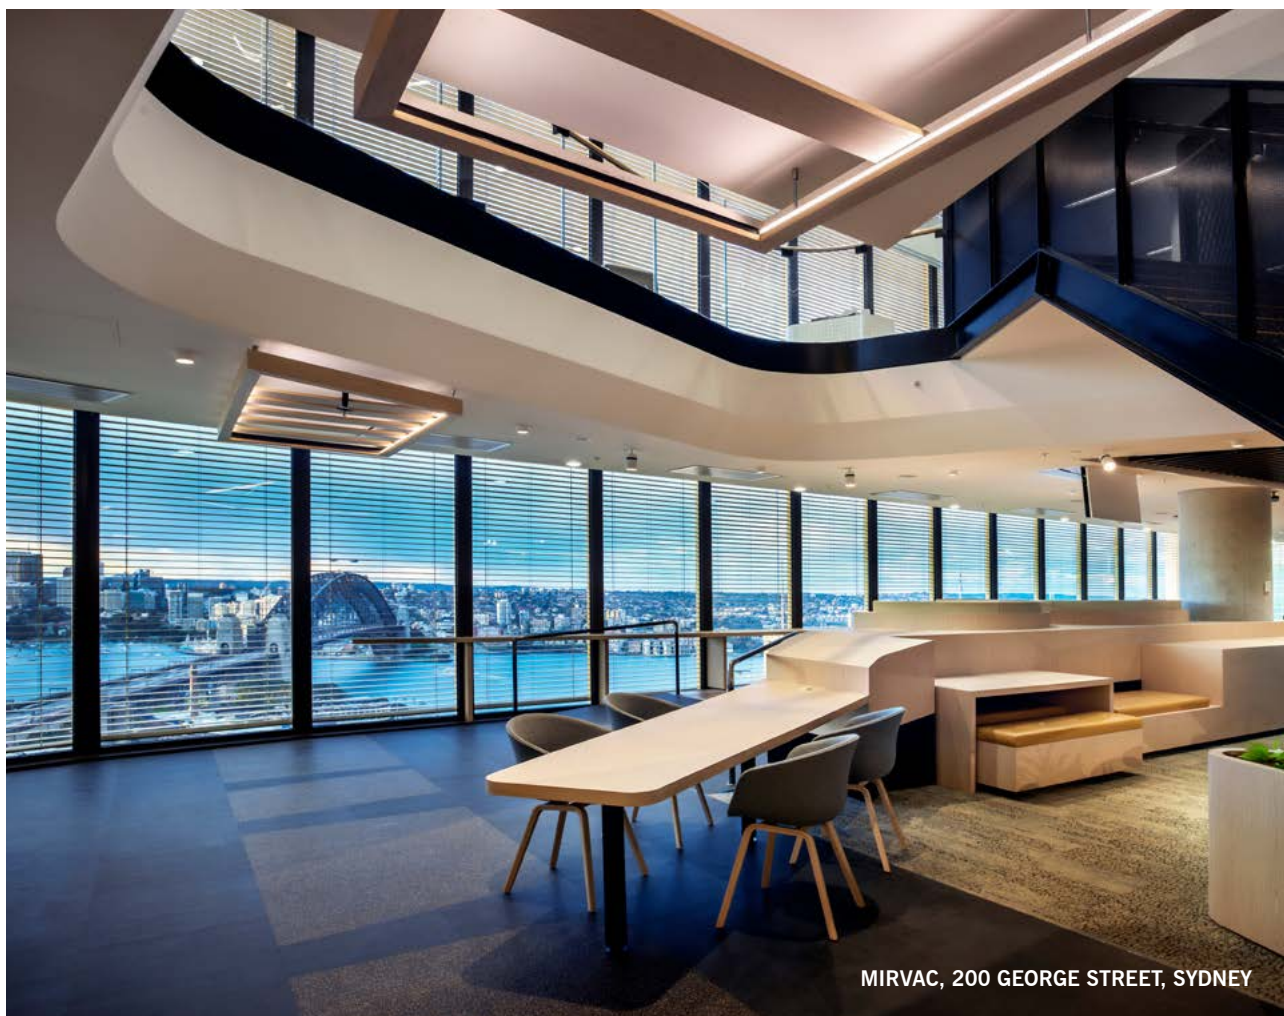

## CORE RANGE

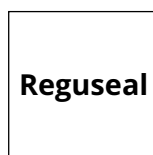

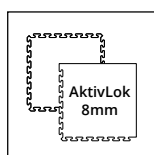

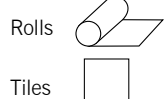

IT'S THE ORIGINAL AND MOST SUCCESSFUL EVERROLL® PRODUCT; THE CORE OF OUR COLLECTION. **EVERROLL® CORE** IS LIVING PROOF THAT GOOD DESIGN NEVER GOES OUT OF FASHION.

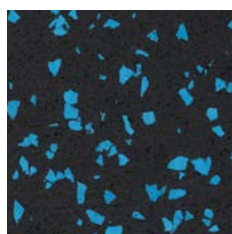

MIRVAC, 200 GEORGE STREET, SYDNEY

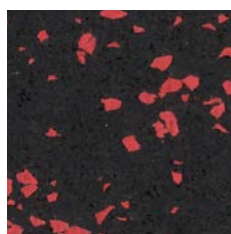

Available in:

Diamond Berlin

4

Diamond Mons

4

Other thicknesses available on request

## COMPOSITE FLOORING

THERE ARE TIMES WHEN DESIGN MUST TAKE A BACK SEAT TO COMFORT. IN SUCH INSTANCES, **EVERROLL® COMPOSITE FLOORING** IS AN ELEMENTARY CHOICE.

## COMPOSITE FLOORING

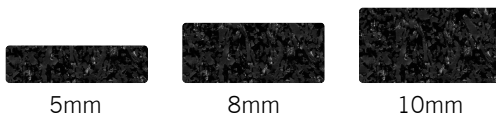

Durability and comfort are the result of a synthesis of composite layers. The upper wear layer of your choice in **everroll® Rubber Flooring**, is supported by a shock-absorbent **Regupol® Shockpad Underlay**, combining durability with added resilience.

Whilst there are two layers, the benefits are felt on many levels. On one hand, the safety of shock absorbency. On another hand, it provides acoustic dampening of foot fall and impact noise.

With its high levels of comfort and resilience, **everroll® Composite Flooring** has the ability to remain permanently elastic for the life of your flooring.

## FLOOR INLAYS

Enhance your brand with a customised logo or a creative aid; our inlays are permanent and impressive, a custom inlay will communicate your message to your valued customers.

Our in-house cutting technology and design service enables us to cut almost any shape you desire to precise specifications.

**Call us today to discuss your requirements.**

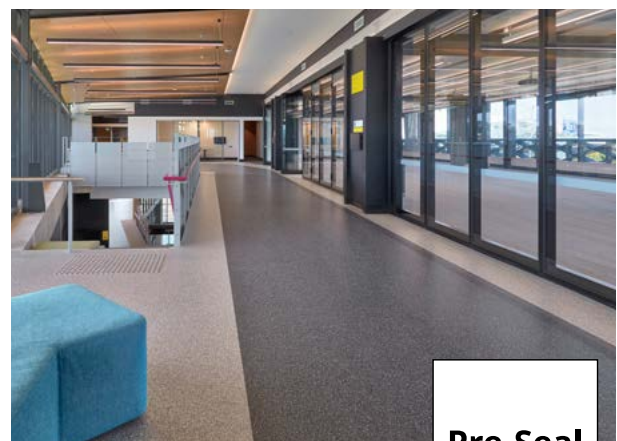

## PRE-SEALING

everroll® has been designed to exact specifications, giving a good balance between comfort and ease of cleaning that you would expect from any floor.

But for some applications, sealing the material is desirable. Utilising advanced polymer sealing technology, our new Reguseal sealer allows for quicker, easier cleaning.

We can utilise this advanced polymer sealing technology to pre-seal the material, direct from our factory. Saving you time and effort during installation.
